

Skagit RC

May 21st. Minuets

5/21/2019

After the meeting was opened by the President. A new member was introduced, and a returning member who in the past had served in just about every capacity that one could do, in order for the club to function. Welcome back to Paul McDill, also welcome Bob Shupe who some members have known for a little time as 1st. Lt with the Civil Air Patrol.

The Treasurers report, Shows a balance of \$2140 as of the last statement. There was some concern, that this balance needs to be increased by some means for the club to be able to continue into the future. Suggestions of E bay sales, raffles etc. were discussed and as a general consensus turned down. We know that certain members have achieved this by donating, money and time. Addition donations from the membership or an increase in club dues, appears to be a better way to increase the financial stability of the club. It is known that the bank balance was \$5000 at the time the club moved to its present flying location.

Bob Shupe, due to his involvement with CAP, was able to advise that our flying field is not on the FAA map for our hobby. So far this has not been a problem or a concern addressed by the club.

In new business, a monthly event was suggested. The first being a Fly In and Pot Luck to take place on the Sunday June 16th. Fathers Day 2019

John E. showed and discussed the build of a plane that he had just covered for Dr. Bob. He also explained the use of the blocks that he had made for both use on the tables and on the grass.

The meeting was closed, with the announcement of the next meeting taking place at the Burlington Library. 7:00 pm June 18th 2019
